

VANSHUL LALWANI

• AI / ML Engineer • Full Stack Developer

vanshullalwani43@gmail.com | +91 9302246758 | Bhopal, Madhya Pradesh | github.com/vanshul04 | linkedin.com/in/vanshullalwani27

EDUCATION

B.Tech in Computer Science Engineering — VIT Bhopal University

2023 – 2027

CGPA: 7.51

TECHNICAL SKILLS

AI / ML: CNN / ResNet, Random Forest, XGBoost, Linear Regression, Data Preprocessing, Feature Engineering, Model Evaluation

Languages: Python, JavaScript, Golang, HTML5, CSS3

Web & Backend: React.js, Node.js, Flask, FastAPI, Django, Go (Gin/Echo), REST APIs, Gemini API

Data & Visualization: Pandas, NumPy, Matplotlib, PIL, Leaflet.js, SerpAPI, Google Maps API

Cloud & Tools: AWS (EC2, S3, IAM), Docker, Git, GitHub, VS Code, Postman

PROJECTS

EduMitra — AI-Powered Learning Assistant

2024

HTML · CSS · JavaScript · Gemini API · REST API

- Created an AI chatbot that delivers real-time academic answers and concept explanations across subjects, acting as a virtual tutor via Google's Gemini API.

Quizique — Dynamic Online Quiz Application

2025

HTML · CSS · JavaScript

- Built a responsive quiz platform with dynamic question loading, timer-based flow, real-time scoring, and instant per-question feedback.

Intelligent Disease Prediction & Analysis System

2025

Python · FastAPI · Random Forest · XGBoost · Pandas · NumPy · Leaflet.js

- Built an ML pipeline (Random Forest + XGBoost) on 5,000+ patient records; thorough feature engineering and preprocessing improved model accuracy by ~12%.
- Exposed real-time predictions through a FastAPI backend and visualised geographic disease spread using interactive Leaflet.js heatmaps.

Dermis-AI — Skin Disease Prediction System

2026

React.js · Flask · Python · ResNet/CNN · PIL · NumPy · SerpAPI · Google Maps API

- Developed an AI-powered web app that classifies skin diseases from uploaded images using a ResNet/CNN deep learning model with a confidence score output.
- Integrated SerpAPI with Google Maps to enable location-based dermatologist discovery, making the tool practical for real-world health screening.
- Built a Flask REST API backend and a responsive React.js frontend with real-time image upload, preprocessing via PIL/NumPy, and prediction rendering.

CERTIFICATIONS

Google IT Support Professional Certificate

Coursera / Google | 2026

Applied Machine Learning

Coursera | 2026

EXTRACURRICULAR ACTIVITIES

- MERN Stack Club — Active participant in technical workshops and competitive coding events.
- NSS (National Service Scheme) — Volunteered in community outreach and social development drives.
- Finance Club — Participated in financial literacy events and investment awareness sessions.
- INNOVATEX Hackathon — Competed in an inter-college innovation-focused hackathon.

ACHIEVEMENTS

- Awarded a free laptop by the Government of Madhya Pradesh for academic excellence in Class 12 board examinations.
- University tuition fee scholarship under the MMVY academic excellence scheme.
